Reference for Australian Enviro Services (AES)

---

To Whom It May Concern,

I have worked on projects in conjunction with AES at Kambah Joint Emergency Services Centre, incorporating ACT Fire Brigade and ACT Ambulance Service facilities and personnel.

The project was to remove and remediate the site in association with on-site underground fuel storage tanks. The work carried out by AES was in accordance with all relevant Australian Standards, ACT Government and ESA requirements with the primary benefits being;

- Excellent managed communications between site personnel, project team and contractors,
- Work delivered within budget and on time,
- High standard of work and having skilled and knowledgeable staff,
- Great value for money project and site management,
- Effective project scoping and scope management.

I would be happy to clarify or add to any of the information provided above, please contact me at your convenience.

Regards

Darren Smith  
Project Manager  
ACT Emergency Services Agency  
Dept of Justice and Community Safety
