Dear James,

BORAL PLASTERBORAD - BARRIER STREET, FYSHWICK

I'm pleased to provide this reference following the recent project undertaken by Australian Enviro Services Pty Ltd (AES) to remove asbestos cladding and related impacts from our Plasterboard warehouse facility in Fyshwick ACT. AES were professional throughout the project from tendering through to project completion which was achieved on time and within budget. Furthermore, AES took a fair and reasonable approach to variations which were managed well to minimise impacts on the budget and program.

The works completed by AES and its subcontractors were of a high quality and resulted in the site being given a complete clearance from asbestos impacts. Independent monitoring throughout the project confirmed the works were completed in accordance with regulatory requirements and industry standards.

AES took a very professional approach to managing both community consultation and industrial relations in conjunction with the Boral project team, avoiding potential for delays or community complaints. Similarly the environmental and safety management of AES was to a very high standard, with no incidents occurring throughout the project.

If you would like any further information on the above please do not hesitate to contact me on 9033 4404.

Yours sincerely,
Boral Recycling Pty Ltd

Cameron McArthur
Project Manager
